Career Objective

Motivated third-year Computer Science and Engineering student with a strong foundation in Java, C Programming and a passion for software engineering and problem-solving. Experienced in developing full-stack web applications using Next.js, Django, and PostgreSQL, with hands-on exposure to modern development practices and databases. Eager to apply technical knowledge, write efficient and scalable code, and contribute to innovative software solutions while continuously learning and growing in a collaborative professional environment.

Education

SJB Institute of Technology
Bachelor of Engineering, Computer Science

Sep 2023 – July 2027 (Expected)
CGPA:9.67/10 (Current)

Technical Skills

- **Programming Languages:** Java, C Programming
- **Databases:** SQL, PostgreSQL, Supabase
- **Web :** Django, HTML, CSS, JavaScript
- **Data Analysis & Visualization:** Tableau, PowerBI
- **Tools & Platforms:** Git, GitHub, VS Code, Excel, PowerPoint, Arduino IDE
- **Core Areas:** Data Structures & Algorithms, Object Oriented Programming, Full Stack Development, REST APIs, AI Integration.

Projects

- **AI-Based Blood Management System (Ongoing Major Project):** Developing a full-stack blood management system with dashboards, inventory tracking, emergency request handling, QR-based tracking, email alerts, and SARIMA-based blood demand prediction using Next.js, PostgreSQL, and Supabase.
- **College Results Analytics System:** Designed a Django-based web application for student result management and academic performance analysis, featuring searchable student records, subject-wise insights, and interactive dashboards to visualize trends. The system also generates downloadable PDF marks sheets and CSV reports for efficient result sharing and record management, while providing administrators with an organized interface to monitor student performance and streamline result processing.
- **MediCue – AI Integrated Healthcare Assistant:** Built an AI-integrated healthcare application providing medical assistance, symptom guidance, and AI-powered medical report analysis and simplification through an intuitive interface, making healthcare information more accessible and user-friendly.

Hackathons & Technical Events

- **Cognizant Technoverse Hackathon** - National-Level Hackathon, Cognizant Technology Solutions (Participant, May 2026)
- **TechFusion 2.0** - 24-hour Hackathon, Dayanand Sagar Academy of Technology and Management (April 2026)
- **Cyborg** - Technical Event, SJBIT (March 26, 2025)

Certificates and Involvement

RPC 2024:

Student Volunteer — RPC 2024, Bangalore | Appreciated by Edulateral Foundation for contribution and event support.

NPTL:

Introduction to Industry 4.0 and Industrial Internet of Things (90%)
Understanding Incubation and Entrepreneurship -(71%)
AI in Human Resource Management-(85%)

Personal Details

- Languages Known: English (Professional), Kannada (Native), Hindi
- Open to continuous learning and comfortable adapting to new technologies and environments
